*I think one must try to follow in the direction pointed by one's inspiration. When I look back at forty years of basketmaking I find I have been led on a journey of discovery beyond anything I could possibly have imagined when I started making baskets... We must realize that we also have an obligation to the creative urges that arise within us. They are tender shoots of green which can grow strong if we nurture and look after them.*

— Joe Hogan, *Learning From The Earth*, 2018
