The poet Rilke... saw it as our task to imprint the temporary sensations of the earth into the depths of our being so that the essence would arise again in some other form within us. This is what I'm attempting when I make artistic baskets... I am trying to rediscover this sense of belonging, of being at home upon this earth, believing on some deep level that this will make us more inclined to sharing and cooperation.

— Joe Hogan, *Learning From The Earth*, 2018
